

Gifted and Talented Education at MSU

CHAMP

Experience the challenging and rewarding CHAMP program and develop your mathematical knowledge in half the time required for high schools! In two years, you will receive four years of credit in a high school math curriculum. Think of all the additional opportunities to enroll in interesting electives or even the chance to dual enroll in college classes while still in high school!

An informational meeting will be held on March 17th in 108 Bessey Hall on Michigan State University's campus from 6:00pm-8:00pm.

ISHALL

Participate in the gratifying and intensive ISHALL program and develop your understanding of literature and the humanities in half the time! Students study authors and playwrights with MSU Professors. In two years, you can receive credit for four years of high school English requirements. This frees students up to take other honors courses, Advanced Placement, or even college classes instead of taking English classes.

An informational meeting will be held on March 17th in 108 Bessey Hall on Michigan State University's campus from 6:00pm-8:00pm.

West Side– NEWCHAMP

Due to the popularity of our accelerated Math program CHAMP, the Office of Gifted and Talented Education started two satellite programs on the East and West side of Michigan. NEWCHAMP is based out of Newago and services the four surrounding counties. Participants earn four years of Math credit for two years of study. Students are taught by MSU professors and have study-labs for individual attention.

East Side– MCHAMP

The East Side extension of our CHAMP program is MCHAMP. This program is taught at Memphis High School in St. Clair county. MCHAMP services the four surrounding counties and offers students the chance to receive four years of high school math education in just two. All classes are taught by MSU math professors and students have extra individual time to ask questions and review homework.
